

***For those times a model 60 is too large and the model 30 is too small.***

**UNIVERSAL MODEL 40**

***Introducing the NEW Universal Model 40.***

Available in either the versatile Universal I clean out of place design, or the clean in place Universal II. Same great features as the Universal pump family, with a displacement of 0.076 gallons per revolution.

**Ask about the model 40 on your next application!**

**Port size: 2" standard**

**Pressure ratings: Universal I: 150 PSI (10 bar)**

**Universal II: 150 PSI (10 bar)**

**Flow: 45 US GPM (170 LPM) @ 600 RPM**

**Universal I:** Same options and features as the Universal I product line including the standard O-ring seal, a variety of port connections, elastomers and 3-way mounting. Optional double o-ring with flush connections, single and double mechanical seals, vented or jacketed cover, stainless steel gear case, 2 inch ports.

**Universal II:** Same options and features as the Universal II product line including standard single mechanical seal, a variety of port connections, elastomers and 3-way mounting. Optional double mechanical seals with flush ports, CIP flat body profile, vented or jacketed cover, stainless steel gear case.
